ENHANCING THE DIGITAL LITERACY OF ALL PARTICIPANTS IN THE EDUCATIONAL PROCESS AS A PREREQUISITE FOR THE SUCCESSFUL DEVELOPMENT OF A DIGITAL EDUCATIONAL ENVIRONMENT IN A GENERAL SECONDARY EDUCATION INSTITUTION

Yana Hrytsai,
Simon Kuznets Kharkiv National University of Economics,
Department of Pedagogy, Foreign Philology, and Translation

REGARDING DIGITAL LITERACY

Administration

Low digital literacy among teaching staff negatively affects the development of the digital educational environment

Teaching Staff

need and have the opportunity to participate in various professional development activities related to digital literacy

Learners

use digital technologies to complete creative tasks and believe that digital literacy is an important component of the educational process

Parents

they believe that their level of digital literacy influences the development of the digital educational environment

ENHANCING THE DIGITAL LITERACY OF THE ADMINISTRATION AND TEACHING STAFF

Targeted Programs

They contribute to enhancing the digital literacy of all participants in the educational process

Professional Development Courses

Using online platforms or in-person classes to improve digital literacy levels

Exchange of Experience

Conducting master classes, training sessions, and webinars on the use of digital tools in general secondary education institutions

ENHANCING THE DIGITAL LITERACY OF LEARNERS

- Practical Sessions
- Trainings
- Project Activity
- Digital quests

IMPROVING PARENTS' DIGITAL LITERACY

- Practical Seminars
- Trainings
- Consultations
- Parent Meetings
